- You gain proficiency with cook's utensils if you don't already have it.

- You gain a new rest move for long rests: You can prepare food for a number of creatures equal to 3 + your proficiency bonus. Creatures may eat the food as part of their other long rest moves, and those who do gain 1d6 + your proficiency bonus temporary hit points until the end of their next long rest.

- You ignore the loading quality of crossbows with which you are proficient.

- When you use the Attack action and attack with a one handed weapon, you can use a Minor Action to attack with a hand crossbow you are holding.

Crusher

You are practiced in the art of crushing your enemies, granting you the following benefits:

- Once per turn, when you hit a creature with an attack that deals bludgeoning damage, you can move it 5 feet to an unoccupied space and inflict the Exposed condition.

Defensive Duelist - Origin

- You can select this feat multiple times. Each time you do so, you must choose a different damage type.

Fighting Initiate - Origin

Prerequisite: Proficiency with a martial weapon

Your martial training has helped you develop a particular style of fighting. As a result, you learn one Fighting Style option of your choice from the fighter class. If you already have a style, the one you choose must be different.

Whenever you reach a level that grants the Ability Modifier Improvement feature, you can replace this feat's fighting style with another one from the fighter class that you don't have.

You've manifested some of the power of chromatic dragons, granting you the following benefits:

- **Chromatic Infusion.** You can expend a Heroic Inspiration as a Minor Action to touch a weapon and infuse it with one of the following damage types: acid, cold, fire, lightning, or poison. For the next minute, the weapon deals an extra 1d4 damage of the chosen type when it hits.

The creature that dealt damage to you must make a Fortitude saving throw (DC equals 8 + your proficiency bonus + your Intelligence, Wisdom, or Charisma modifier). On a failed save, the creature takes 2d8 force damage and is pushed up to 10 feet away from you. On a successful save, the creature takes half as much damage and isn't pushed.

The creature can't benefit from this part of the feat again until it finishes a short or long rest.
- When you spend a use of a healer's kit on a creature that is Clinging to Life, it may regain consciousness. The creature can't benefit from this part of the feat again until it finishes a short or long rest.
- As a Major Action, you can spend one use of a healer's kit to tend to a creature. It regains 2d6 + its level hit points or recovers a number of Stress Slots equal to its proficiency bonus. The creature can't benefit from this part of the feat again until it finishes a short or long rest.

Lucky - Origin

You have inexplicable luck that seems to kick in at just the right moment.

Whenever you make an attack roll, an ability check, or a saving throw, you can take a Stress to roll an additional d20. You can do this after you roll the die, but before the outcome is determined. You choose which of the d20s is used for the attack roll, ability check, or saving throw.

You can also take a Stress when an attack roll is made against you. Roll a d20 and then choose whether the attack uses the attacker's roll or yours.

If more than one creature with this feature takes a Stress to influence the outcome of a roll, the points cancel each other out; no additional dice are rolled.

You can prepare and deliver deadly poisons, gaining the following benefits:

- When you make a damage roll, you ignore resistance to poison damage.
- You can coat a weapon in poison as a Minor Action, instead of an action.
- You gain proficiency with the poisoner's kit if you don't already have it. When you take the Prepare rest move, you may produce a number of doses of poison equal to your proficiency bonus. When a creature takes damage from a coated weapon or ammunition, that creature must succeed on a Fortitude saving throw (DC = 8 + your Wisdom modifier + your proficiency bonus) or take 2d8 poison damage and become poisoned until the end of your next turn.

Polearm Master

You gain the following benefits:

- When you take the Attack action and attack with only a glaive, halberd, quarterstaff, or spear, you can use a Minor Action to make a melee attack with the opposite end of the weapon. This attack uses the same ability modifier as the primary attack. The weapon's damage die for this attack is a d4, and it deals bludgeoning damage.
- While you are wielding a glaive, halberd, pike, quarterstaff, or spear, other creatures provoke an opportunity attack from you when they enter the reach you have with that weapon.

Shield Master

You use shields not just for protection but also for offense. You gain the following benefits while you are wielding a shield:

- You may take the Shove action as a Minor Action with your shield.

- If you aren't incapacitated, you can add your shield's AC bonus to any Reflex saving throw you make against a spell or other harmful effect that targets only you.
- If you are subjected to an effect that allows you to make a Dexterity saving throw to take only half damage, you can use your reaction to take no damage if you succeed on the saving throw, interposing your shield between yourself and the source of the effect.

Skill Expert

Choose one skill in which you have proficiency. You gain expertise with that skill, which means your proficiency bonus is doubled for any ability check you make with it. The skill you choose must be one that isn't already benefiting from a feature, such as Expertise, that doubles your proficiency bonus.

You have practiced extensively with a variety of weapons, gaining proficiency with simple and martial weapons.
